

IT TAKES A VILLAGE TO
EDUCATE A CHILD

*"Tell me and I forget. Teach me and I remember.
Involve me and I will learn."*

-Benjamin Franklin-

Cultivating social and leadership skills through S.T.E.A.M!

Our primary goal is the help boost the self-esteem and confidence of our campers through positive experiences. Each class will start out with an inspirational message to help children start their day RIGHT and believe in themselves. Because we know how important it is for our students to retain their math and ELA skills, we will dedicate time to helping our campers improve their math and ELA strategies. This portion of the program will be led by a certified teacher.

All of our classes are hands on interactive sessions where students will use their critical thinking skills to solve problems. Our classes use a team approach to helping students become better team players and leaders. The following skills are weaved into the curriculum: social and leadership skills, problem solving, goal setting, mindfulness, respect, responsibility, team player skills and more. We use disguised learning to grab student's interests and help them learn in a fun, engaging, supportive environment.

- July 9 – 13th** Introduction to **Engineering**. Students will be exposed to different aspects in engineering. They will use their critical thinking skills to problem solve and create exciting models.
- July 16th – 20th** **STEAM** and **Financial Literacy**. Students will learn the power of a dollar and how they can begin to use financial tools and techniques to create a strong financial foundation for their future.
- July 23rd-July 27th** It's all about the **Arts in STEAM!** We will focus on helping children use their artistic skills. The week will culminate with a workshop at Charles Fazzino's Art Studio.
- July 30th – August 3rd** Learn about the exciting world of **ARCHITECTURAL Design and Entrepreneurship!** Students will be taught how to turn their interesting ideas into a business. They will learn about the basic components that go into setting up and running their own company. Classes will be taught by an entrepreneurship professor and professional architects from KTM Architect. This week will culminate with a presentation at Iona College's HYNES Entrepreneurship Center on August 3 toward the end of the day. Parents are encouraged to join us!

Why FIT IN when you were born to STAND OUT! Dr. Seuss
